

EVAN PARGANOS, P.E.

PRESIDENT & CEO

Years of Experience

12

Professional Licenses

State of New York,
Licensed Professional Engineer

State of New Jersey,
Licensed Professional Engineer

State of Maryland,
Licensed Professional Engineer

Education

Stevens Institute of Technology
B.E. Mechanical Engineering

Professional Organizations

American Society of Heating,
Refrigeration, and Air Conditioning
Engineers (ASHRAE)

US Green Building Council (USGBC)

Professional Experience

2004–Present CEO, EP Engineering, LLC

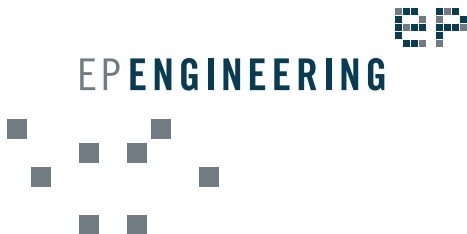

1998–2004 HVAC Project Engineer, AKF Engineers

Engineering Experience and Expertise

- Design of chiller plants, including centrifugal and gas-fired chillers, absorption chillers, air cooled rooftop chillers, and chilled water ice storage.
- Design of condenser water plants, using cooling towers, dry coolers, and geothermal wells.
- Design of heating plants, including high efficiency water and steam boilers, utility steam to hot water systems, and cogeneration systems.
- Design of air conditioning systems, including VAV rooftop, VAV air handlers, packaged air cooled, and packaged water cooled systems.
- Design of HVAC distribution systems for restaurants, libraries, residential buildings, offices, schools, data centers, trading floors, retail spaces, laboratories, industrial facilities, and hospitals.
- Design of kitchen exhaust and makeup air systems; energy recovery systems.
- Design of CRAC systems for critical facilities, data centers, trading floors, and UPS rooms.
- Perform energy audits, energy modeling, and sustainability studies for renewable energy sources for all types of facilities.
- Draft new commissioning and retro commissioning plans for all types of projects, including LEED commissioning plans.
- Manage all trades for MEP/S projects for restaurants, libraries, residential buildings, offices, schools, data centers, trading floors, retail spaces, laboratories, industrial facilities, and hospitals.
- Construction administration for various projects including running job meetings, answering RFI's, reviewing shop drawings, and conducting punch lists and controlled inspections.
